Hisaab AI (■■■■)

Multimodal AI Bookkeeper & Cash Drawer Assistant for Pakistani Kiryana Stores

- Team: HisaabAI | Domain: FinTech / Generative AI | Leader: Huzaifa
- Empowering 2M+ micro-retailers across Pakistan with AI-powered financial management.
- Tech Stack: Google Gemini Flash Multimodal, Groq Whisper-v3, Streamlit, SQLite.
- GitHub: github.com/Huzaifa1102/hisaab-ai • Fully Deployed & Tested

HISAAB AI • PITCH DECK

The Problem: The Fragile Reality of Kiryana Retail

Why 2M+ small retail shops in Pakistan struggle with profitability

1. **The Manual Khata Trap**
   Paper notebooks get lost, torn, or smudged, leaving thousands of rupees in uncollected customer debt.

2. **Dead Capital & Stockouts**
   No inventory visibility leads to locked cash in slow items while fast-moving commodities run out.

3. **Cash Drawer Leakage (Galla)**
   Discrepancies between cash in the till and actual sales go unnoticed without daily reconciliation.

4. **The Digital Literacy Barrier**
   Conventional POS software is in English, expensive, desktop-bound, and too complex for shopkeepers.

The Solution: Hisaab AI Architecture

Tailored multimodal intelligence designed specifically for local shopkeeper workflows

Smart Vision Scanner

Extracts line items, totals, and due dates from handwritten receipts, invoices, and PDF utility bills.

Roman Urdu Voice Khata

Groq Whisper-large-v3 transcribes spoken notes ('Faisal ko 500 ka ghee udhaar diya') into ledger entries.

Automated WhatsApp Reminders

Generates polite bilingual payment reminders dispatched via WhatsApp Web or Cloud API with one click.

Galla Hisaab (Reconciliation)

Balances daily physical cash drawer against sales, repayments, and expenses with a currency counter.

Core Enterprise Features

Production-grade depth built for real-world Kiryana store environments

100% Urdu Localization

Instant toggle between English and authentic Urdu Nastaliq with complete RTL layout support.

Commodity Inventory Ledger

Tracks stock levels, cost vs retail valuation, profit margins, and auto-restocks from scanned bills.

Multi-Store & Security PIN

Multi-tenancy profile switcher with 4-digit PIN lock safeguarding sensitive ledger resets.

Financial Intelligence & Ask AI

Visual expense charts, unpaid bill alerts, and a conversational AI Kiryana financial advisor.

Resilience & 100% Fault Tolerance

Engineered to withstand internet outages and API rate limits

Multi-Key Failover Pool

Automatically rotates through backup Gemini API keys if quota 429 limits are reached.

On-Device Heuristic Fallback

Unseen images and PDFs are parsed locally on-device without internet access.

Zero Key Leakage Security

API keys are masked in password fields, saved in local .env, and never committed to GitHub.

Local-First Persistence

Self-contained SQLite architecture with zero external database dependencies or recurring fees.

BUILD WITH AI HACKATHON 2026

Transforming Informal Retail in Pakistan

Bridging traditional Kiryana commerce with digital financial inclusion

- Live App: Hosted and accessible for judges with 1-click demo ledger seeding
- Source Code: Publicly available at https://github.com/Huzaifa1102/hisaab-ai
- Complete Localization: Authentic Urdu Nastaliq & English
- Next Steps: Micro-lending credit scoring for unbanked shopkeepers
- Team Lead: Huzaifa | Team: HisaabAI | Domain: FinTech
